

THE BREWER HybriGel™ FOAM DIFFERENCE

- Advanced Pressure Management
- Gel directly infused during manufacturing process
- Open Cell Structure allows for airflow and body temperature management
- Made in the U.S.A.

NEW PATENTED TECHNOLOGY EXCLUSIVE TO BREWER

INTRODUCING a new foam technology exclusive to BREWER. viscoelastic “memory foam” infused with GEL provides the ultimate in comfort and pressure management.

COMFORT

The Brewer HybriGel™ foam is uniquely designed to deliver lower average body pressure than other advanced comfort materials.

PRESSURE MANAGEMENT

The body needs proper support. While ordinary viscoelastic foams can sink and hammock, HybriGel™ foam works to support the body for superior pressure relief and alignment.

OPEN CELL STRUCTURE

Heat builds up when your body is in contact with a support foam material. While other memory foams can trap heat against the body, HybriGel™ foam combines an open cell structure with the support gel to dramatically increase airflow and cool the surface temperature.

Brewer

A LEADER WITH WORLDCLASS OEM CAPABILITIES

The Brewer Company OEM Division is the innovative worldwide supply partner OEM's have been turning to for solutions for over 60 years. With manufacturing and engineering expertise in the medical, dental, and optical industries, Brewer's OEM Division adds excellence and value to each service provided.

QUALITY

Brewer means quality every step of the way. From the initial design, through manufacturing and delivery, the Brewer team is dedicated to exceeding expectations. The individual demands of Brewer's OEM customers coupled with internal teamwork provide custom-made, innovative solutions. To meet and exceed the needs of our customers, Brewer is proud to hold the ISO 13485:2003 Certification. Brewer's manufacturing facilities are FDA-registered, complying with quality system regulations (QSR).

SEWN VINYL, LEATHER, OR FABRIC UPHOLSTERY

Brewer utilizes the latest cut and sew techniques performed by expert craftsmen. We're able to manufacture any design solution in the vinyl, leather or fabric of your choice.

CRAFTSMEN YOU CAN TRUST

SEAMLESS VINYL UPHOLSTERY

Thermoformed seamless vinyl upholstery is another Brewer specialty. It's a durable upholstery that's easy to clean and resists water and liquids. We can form this upholstery into nearly any shape and number of pieces to fit your application. It's especially effective for marine, medical, industrial and recreational applications.

"We chose to work with Brewer OEM several years ago due to their outstanding upholstery expertise and ability to deliver the quality that we require and our customers demand. We have never looked back."

~ Walter Gezari, President & CEO, Stidd Systems, Inc.
