

Could your practice benefit from ways to prevent profit-robbing lower back pain that affects 81% of dental professionals?¹

By delivering the ergonomic innovations that safeguard the backbone of your practice, Brewer offers you

The Power to Advance

Brewer

For 20% of dentists, lower back pain results in everything from shortened work hours to a leave of absence.² In addition, 29.5% retire earlier than desired.³ So what can you do about it?

Put yourself in a healthier position with Brewer's unique ergonomic advancements.

Your production is only as good as your wellbeing and that of each member of your team. That's why Brewer continues to lead the fight against profit-robbing musculoskeletal disorders with the most innovative seating solutions available for your entire team.

- **Actively protect your back.**
 - Only Brewer offers the 135DSS – Dynamic Split-Saddle-Seat Technology.
 - Lessens spinal muscle degeneration and back pain.
- **Optimize production.**
 - The Brewer 135DSS eases the load on back muscles by distributing weight over "sit bones" and wider hip abduction lessens the tendency to slump.
 - Operate comfortably and at peak efficiency, longer... day-in and day-out.

Better Ergonomics. Smarter Economics.

Traditional seating tends to restrict core muscle movement, causing these muscles to atrophy and larger muscles to overcompensate. The result: chronic back pain and fatigue. The Brewer 135DSS changes all that.

- **135° upper and lower leg angle**
 - Naturally straightens the spine.
 - Minimize strain on back muscles.
- **Engineered to support deeper breathing**
 - Result of elongated torso.
 - More oxygen promotes circulation and helps reduce fatigue.
 - Progressively strengthen back and core muscles.

According to the ADA, more than 300,000 injuries can be prevented each year with ergonomic seating.⁴

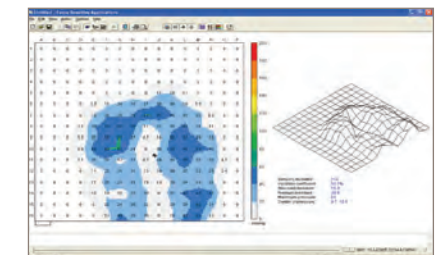

Nagging musculoskeletal injuries erode production revenue through fatigue, missed days, workers compensation claims and the inefficiencies of retraining temporary hires or staff replacements.

Fortunately, Brewer can help dental professionals avoid these costly issues with state-of-the-art solutions.

- **Neutral posture minimizes risk of musculoskeletal disorders.**
 - Seat incline of 10-15° helps keep body comfortably aligned.
 - Flexible, waterfall-designed-front seat gets you closer to the patient.

- Our backrest lumbar support centers in the natural lumbar curve for maximum back support.
- Backrest ergonomically designed to allow shoulder blade clearance for easier range of movement.

- **Pressure-reducing benefits of HybriGel™ Foam**
 - Pressure mapping shows that HybriGel™ outperforms all other materials on the market today for weight distribution.
 - HybriGel™ is used in seat and body supports to maximize user comfort.

Pressure Mapping

By delivering production-boosting innovations, Brewer offers you the power to advance your health and the health of your practice.
