

Want to say goodbye to profit-robbing back pain?

By introducing innovative, ergonomic saddle seat technology,  
Brewer delivers a new way to offer you

## The Power to Advance

*Brewer 135DSS Dynamic Split-Saddle-Seat Technology*

**Brewer**

Data shows that profit-robbing lower back pain affects 81% of dental professionals, which can lead to shortened work hours, leaves of absence and shortened careers.<sup>1,2</sup> So what can you do to help safeguard yourself and your entire team?

## Optimize posture and production with Brewer's latest patented breakthrough – Dynamic Split-Saddle-Seat Technology.

Musculoskeletal disorders in the workplace account for \$14 billion in worker compensation and result in 100 million lost workdays. In order to maximize your production, it's imperative that you do what you can to protect the back health of every member of your practice.

That's why Brewer is proud to introduce the 135DSS – a unique combination of leading-edge ergonomic technology and real-world affordability. The result is an innovative solution specifically designed to help make doctors, assistants and hygienists as comfortable and productive as possible.

- Naturally aligns vertebrae and discs.
- Relieves shoulder and neck tension.

**Ergonomic saddle-seat design enhances posture**

- Lessens spinal muscle degeneration and back pain.
- Core muscles become active and support the spine when sitting, which helps them become stronger over time.

**Dynamic action strengthens your core as you work**

**Patented Split Saddle Seat improves comfort**

- Eases the load on back muscles by distributing weight over "sit bones" and wider hip abduction lessens the tendency to slump.
- Helps cool the body, relieve pressure, improve circulation and protect reproductive health.

**Engineered to support deeper breathing**

- Result of elongated torso.
- More oxygen promotes circulation and helps reduce fatigue.

The Brewer 135DSS features back-protecting Salli® Dynamic Split-Saddle-Seat Technology.

### A unique angle on comfort

The Brewer 135DSS is designed to provide the most comfortable seating position possible.

Simply adjust the seat height so your upper and lower legs create a 135° angle while both feet are flat on the ground. This position naturally straightens the spine to minimize strain on back muscles.

In studies, 87% of women and 80% of men have preferred the patented split-saddle-seat technology found in the innovative Brewer 135DSS to other seating options.

#### Simply Select the Model Ergonomically Designed for You

Model Number	User Height
135DSS-L	Under 5'3"
135DSS	5'3" to 5'11"
135DSS-H	Over 5'11"

Pressure mapping images clearly show the significant pressure relief provided by the patented Salli® Split-Saddle-Seat technology found in the Brewer 135DSS.

The Power to Advance
