

Brewer

Dental Seating

Ergonomically
designed to
support the health
of your practice.

Delivering the Power of Neutral Posture

Musculoskeletal Disorders are a pervasive problem for dental professionals.

MSDs can cost a practice more than \$67,000 per incident.¹ They have been documented to affect more than 80% of all dental professionals and are known to shorten careers and erode a practice's bottom line. Prolonged sitting in poorly designed stools will result in muscular fatigue and can contribute to musculoskeletal pain and injuries.

Proper posture is critical to the long-term health and productivity of your dental team.

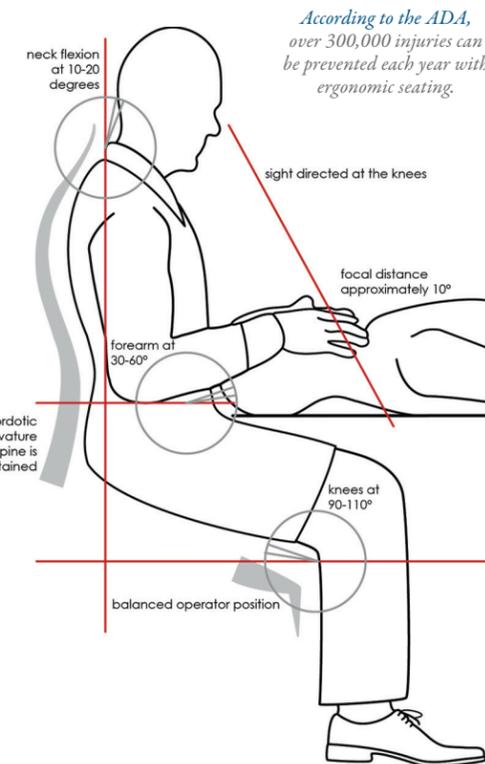

The risk of injuries involving the back, neck and shoulders can be greatly reduced by working in Neutral Posture – a balanced, upright position with your weight evenly distributed. In addition, appendages are neither moved away from the body's midline, nor laterally turned or twisted.

Model 9000BST shown in Black Satin upholstery with arms (part #101282) sold separately

Designed to make a difference.

Working in conjunction with Marquette University, Brewer has analyzed working conditions in the dental operator. Through extensive testing and observation, we have pinpointed the proper seating mechanics needed to more effectively meet the strenuous demands of dental professionals. The results of these efforts are a line of highly advanced, ergonomic seating solutions specially designed to help safeguard the very backbone of your practice.

So be sure to take a good look at all the ways Brewer adds value to your practice.

Advancing Ergonomic Innovation to Enhance Your Comfort

Specializing in breakthroughs that matter.

From carefully researched design refinements to entirely new concepts in seating, Brewer is constantly working to offer you the most advanced, most comfortable seating solutions in the industry.

Most are features we introduced to the market, and many remain exclusives to this day. One thing they all have in common is our commitment to provide you with the ultimate dental seating experience to keep you more productive all day, every day.

Dual Dynamic Motion Technology.

Brewer is the first in the industry to incorporate Dynamic Motion Technology into both the seat and backrest. Now, you get two ways to engage your core as you work to promote back health.

Patented, Dynamic Split-Saddle Technology.

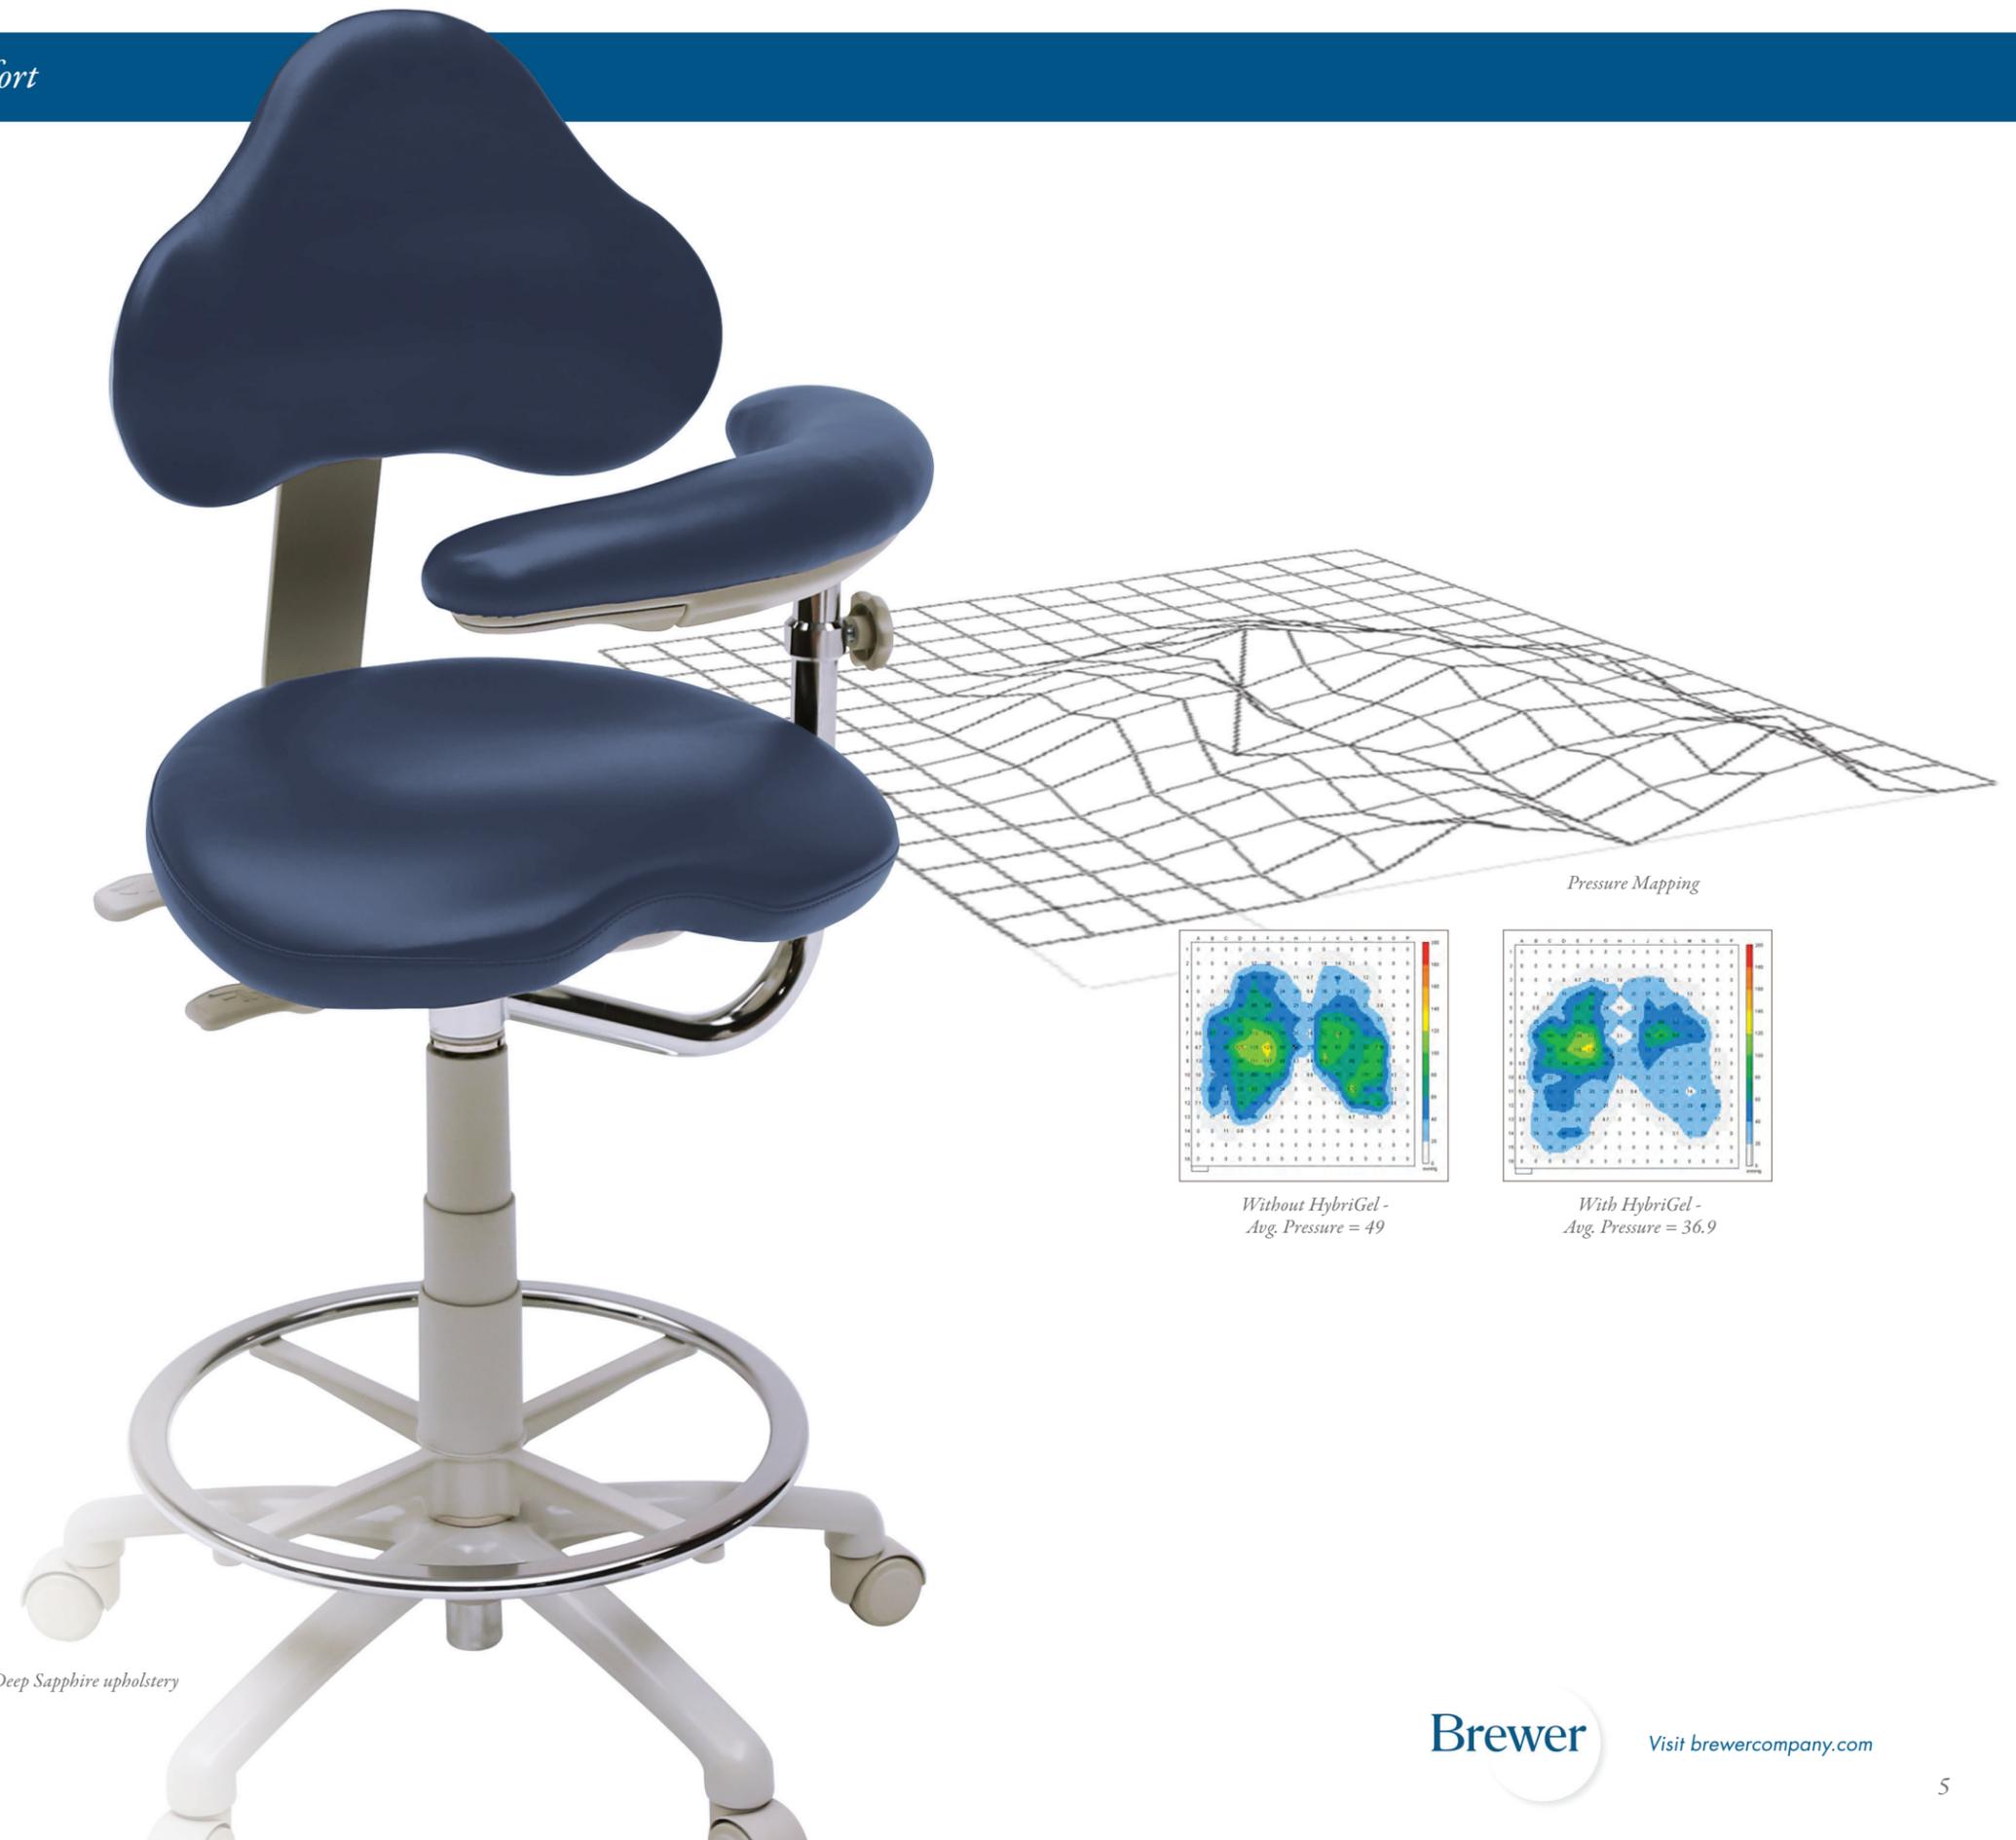

This Brewer exclusive combines a seat design that naturally supports neutral posture with full 360° tilt to help strengthen your core as you work.

Seat tilt and lumbar support.

Helps maintain the ideal low-back curve, decrease disc pressure, enable closer positioning to the patient with less muscle strain and may help reduce low-back pain.

Unmatched pressure management & comfort.

HybriGel™ Foam is a Brewer exclusive in the industry. This gel-infused memory foam supports the body for superior pressure relief, while its open cell structure dramatically increases airflow for greater cooling comfort.

Model 9120BL shown in Deep Sapphire upholstery

Premium Ergonomic Seating – 9500 Series

Redefining comfort with latest & greatest ergonomic advances.

The 9500 Series integrates the best of Brewer’s proven ergonomic expertise with the latest design advancements in the industry. It includes the introduction of our third generation of Dynamic Motion Technology and an innovative wrap-around backrest. Everything about this stool contributes to facilitating freedom of movement – for enhanced comfort, reduced fatigue and optimum productivity.

9500 Series

The evolution of ergonomic comfort continues with the state-of-the-art in the fight against back pain.

Premium Ergonomic Seating – 9000, 9100 & 9200 Series

In sync with your comfort and productivity needs.

Unlike most dental stools, our Premium Ergonomic Series seating features continuous, synchronized movement of the saddle-style seat and lumbar support. This combination allows for proper weight distribution and encourages neutral posture throughout your typical range of motion to help prevent fatigue and promote muscular health. Plus, all models feature our exclusive HybriGel™ Foam for unmatched pressure management and cooling comfort, and a standard 5-year warranty.

9000 Series

9200 Series – Backrest 18" W x 12" H, Seat 19" W x 16.5" D

Dynamic Split-Saddle-Seat Technology – 135DSS Series

Patented design promotes back health.

The patented split saddle seat design eases the load on back muscles by distributing weight over the “sit bones” while the angle of the saddle results in wider hip abduction to enhance posture, naturally align vertebrae & disks, and relieve shoulder and neck tension. At the same time, unique 360° dynamic motion engages core muscles, helping strengthen back muscles over time. This innovative combination helps make dentists and hygienists as comfortable and productive as possible throughout their work day.

135DSS Series

Available in three height ranges so an optimal 135° angle of the knee can be achieved in order to naturally straighten the spine and minimize back muscle strain.

Model 135DSS in Taupe

Models

	Adjustable Height Range	Seamless Upholstery	Recommended User Height
135DSS	22.5"-29.75"	•	5'3"-5'11"
135DSS-L	18.75"-23.75"	•	Under 5'3"
135DSS-H	24"-33.75"	•	Over 5'11"

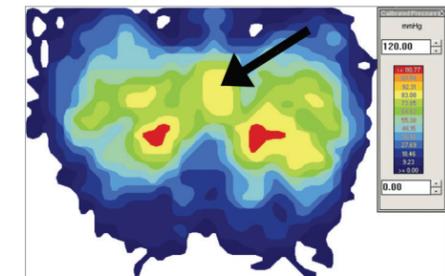

Accessories

312670 - Optional locking casters (set of 5)

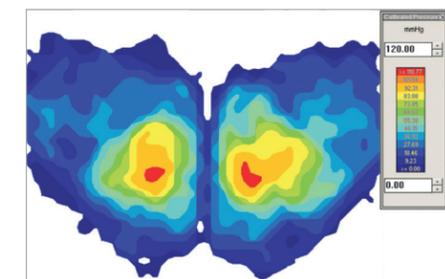

Model 135DSS shown in Black Satin upholstery

Pressure mapping images clearly show the significant pressure relief provided by the patented Salli® Split-Saddle-Seat technology found in the Brewer 135DSS.

Ordinary Saddle Seat

Dynamic Split Saddle Seat

Premium Ergonomic Seating – 3100 & 3300 Series

A practical blend of ergonomics, comfort and durability.

All our Performance Ergonomic Seating is designed to be a welcome addition to your practice for years to come. Our contoured 18" wide x 18" deep seat cushion features a flexible, waterfall front edge for enhanced comfort. Dentist's & hygienist's models include an adjustable, contoured 13" high x 15.5" wide backrest – standard. To hold up to demanding work days, all come equipped with a 24" diameter, powder-coated, 5-leg cast-aluminum base and hooded, dual-wheel casters – complete with polyurethane tread to protect your floor surfaces. Each offers a 250-lb weight capacity and is backed by a standard 5-year warranty for added peace of mind.

3100 Series

Available in three design configurations and three different adjustable pneumatic height ranges to meet the needs of your team.

Dentist/Hygienist Models
